

Marco Bianchi, PhD

London, United Kingdom — marco@mmb-advisers.com — 07505 181967 — mmb-advisers.com

PROFILE

Founder of MMB Advisers, developing two complementary systematic approaches across the signal-frequency spectrum: TP Dates CP, a low-frequency capital protection overlay anchored on a small number of ex-ante turning-point dates per year; and a fully automated pure quant pod-type strategy generating multiple signals per week across major global equity indices. 30+ years researching and deploying automated trading strategies. Award-winning track record building production systematic strategies (Eurohedge Award Winner and Runner-Up). PhD in Statistics & Econometrics (LSE, within the European Doctoral Programme).

EXPERIENCE

- MMB Advisers** London, UK
Director & Owner 2009–Present
TP Dates CP: ML/AI-powered capital protection overlay providing ex-ante early-warning windows for elevated crash risk, with limited-intervention hedge overlays. **Pod Strategy:** Fully automated quant strategy on DAX cash index (applicable to SPX, NDX, Nikkei 225, NIFTY 50), producing multiple signals per week.
- Ethus** London, UK
Co-Founder & Head of Quantitative Research 2017–2025
Researched and deployed systematic L/S equity strategies across global markets. Developed proprietary alpha signals, market timing and regime detection models (GARCH, Markov switching). Led team of four quantitative researchers.
- Thames River Capital** London, UK
Co-Manager, Kingsway Fund (L/S European Equities, \$250M AUM) 2004–2009
Deployed systematic strategies achieving 18.82% annual return, 2.04% max drawdown (Eurohedge Runner-Up 2006). Built stock selection and quantitative market timing models.
- Newman & Ragazzi** London, UK
Risk Manager & Quantitative Analyst 2000–2004
Supported systematic L/S European equities fund (Giano Capital, \$500M AUM, Eurohedge Winner 2003). Developed valuation framework for 250+ European stocks with 10-year backtests.
- Salomon Smith Barney Citi** London, UK *VP, Global Asset Management, Derivatives* 1999–2000
- Barclays Capital** London, UK *Director, Risk Manager, Corporate Bonds* 1997–1998
- Bank of England** London, UK *Senior Analyst, Monetary Instruments & Markets* 1994–1997

EDUCATION

- PhD, Statistics & Econometrics** London School of Economics, UK (1991–1994)
- MSc, Economics (Quantitative Methods)** Catholic University of Louvain, Belgium (1990)
- BSc, Economics (Quantitative Methods)** Bologna University, Italy (1985–1989)

SYSTEMATIC STRATEGY SKILLS

- Capital Protection & Tail Risk:** Ex-ante crash-risk windows, turning-point detection, cycle/spectral analysis, ML-powered indicators, hedge overlay design
- Alpha Research:** Signal generation, factor modeling, fundamental/technical indicators, backtesting, walk-forward analysis
- Portfolio Construction:** L/S equity, factor exposure optimization, risk budgeting, automated rebalancing, beta management via derivatives
- Quantitative Methods:** Time series econometrics (ARIMA, GARCH, VAR), ML (ensemble methods, gradient boosting), regime detection
- Programming & AI:** Python (pandas, NumPy, scikit-learn, statsmodels), R, SQL, Git/GitHub; power user of Claude, Kimi, Cursor, Opencode for accelerated research and coding
- Languages:** English, Italian, Spanish, French (fluent); German (working knowledge)

SELECTED ACHIEVEMENTS

- Eurohedge Award Winner 2003:** L/S European Equities (\$500M AUM), 20% return, 0.50% max drawdown
- Eurohedge Award Runner-Up 2006:** L/S European Equities (\$350M AUM), 18.82% return, 2.04% max drawdown
